

**Ava RSRV** flooring from Ava by Novalis comes with three wood patterns in six common base colors. The line is available in a variety of embossed plank styles to mix and match, along with four concrete patterned tiles. The flooring features a high-density core click construction, acoustical backing, a 22 mil wear layer, and an overall thickness of 6 mm.

Visa Lighting's **Lenga Behavioral Health** slot luminaires are designed for patient settings that require ligature and tamper resistance. The unit produces ambient and asymmetric exam light levels with white (3000K, 3500K, or 4000K) or tunable sources. The recessed units measure 3 inches wide and 4 inches deep and are flush with the ceiling.

Integra Seating's **Coastal Collection's Tide Metal** seating offers coordinating wood frame options, enhancing the array of customizations. All pieces meet the Healthy Hospitals Initiative—Health Interiors Safer Chemical Challenge and are Clean Air Gold certified. Features include wear point seat rotations; a cleanout seat design; and nonporous, noncorrosive, solid-surface arm caps. The new series is available in different heights along with an island seat option. It passes 1,000-pound drop and 2000-pound static load tests, and all components are recoverable and replaceable.

Interface's **Criterion LVT** is a 3 mm, resilient luxury vinyl tile product that offers an integrated flooring solution when paired with Nora by Interface premium rubber flooring, providing seamless transitioning. Criterion is fully recyclable and available in a combination of skinny plank and tile designs. The flooring is carbon neutral through its entire product lifecycle and is part of the company's Carbon Neutral Floors program.
