Integra Seating's **WELLNESS DIVIDER** can be used between seated guests in waiting rooms, lounges, and guest and lobby areas to mitigate germ transmission. Freestanding at an overall height of 52 inches and weighing 26 pounds, the divider has a clean aesthetic with base and upright supports made of solid steel with a silver powder-coat finish. The divider comes in transparent polycarbonate or white high-density polyethylene material options. <https://integraseating.com>

Winco Window Co.'s **TRANSIRA PRIME WINDOW SOLUTIONS** encases a high-performance vertical shade in between two pieces of glass, offering increased thermal benefits while making it difficult for allergens and airborne pathogens to collect on the shade's fabric. The window system can be locally controlled via a wall-mounted keypad or integrated into the building's management system. <https://wincowindow.com>
