### >Integra (10-140)

Integra Seating is announcing several **updates** to its **Alpine Collection**, reflecting the enhanced maintenance and personal safety requirements needed for today's commercial interior environments. The Brighton, Solitude and Alta Series, all part of the Alpine Collection, now feature an all-sides clean-out option. With space between the seat, the back and the sides, this feature not only reduces the time needed to clean the seat, but enables more of the entire seat and surrounding surfaces to be thoroughly cleaned and sanitized as needed, since debris can easily fall to the ground without getting lodged within the seat. All chairs within the series are also available with solid surface arm caps, which are easy to clean and sanitize. The steel bar or cylinder leg options are also durable and easy to clean and maintain. The Brighton, Solitude and Alta chairs within the Alpine Collection are compliant with the Healthier Hospitals Initiative of Safer Chemicals Challenge. Integra: Alpine Collection-Brighton Island Seat

### >Interface (10-134)

Capturing the essence of the well-known Manhattan thoroughfare, with its museums, high-end retail and luxury apartments, **5th Ave Collab™** was designed in partnership with several NYC-based customers. The collection features elevated palettes of gray that range from cool to warm, plush to flat, linear to organic. With a style to complement every preference, 5th Ave Collab offers a refined balance of neutral textures to uplift any space. 5th Ave Collab features eight existing Interface carpet tile products, including one FLOR product, in eight neutral colorways: natural, black, fog, titanium, pewter, pepper, ink and indigo. 5th Ave Collab is made with recycled nylon, and like all Interface products globally, is part of the company's Carbon Neutral Floors™ program that zeroes out the carbon emissions associated with the lifecycle of the product.
