

electronics and mechanical systems associated with U.S. Navy vessels and the semiconductor industry. He earned his bachelor's in civil and environmental engineering at the University of Massachusetts at Lowell, with an emphasis on environmental science and impacts.

Jesse Carano

-Manny Nuno, also promoted Civil Engineering Manager, brings more than 15 years of project management and engineering experience to his new role. Together with Carano, the duo will take a larger overall role leading the growth and management of the Civil Engineering team in Denver. The firm's Denver office has over 30 civil engineering team members, making it Ware Malcomb's largest civil engineering team. Nuno's experience includes a variety of markets including public works, municipal districts, mixed-use, industrial, multifamily, science and technology, retail and logistics. A registered Professional Engineer, he has experience leading the management and oversight of numerous land development projects, leading the major design aspects

throughout the duration of projects in his previous role as Senior Project Manager. He earned his bachelor's in civil engineering with an emphasis in Structural and Environmental Engineering at the University of Notre Dame. [Read More](#)

ENVIRONMENT

>Herman Miller and Studio 7.5 have revisited the Mirra 2 Chair and Stool, further reducing the design's carbon footprint by reassessing how every element could be more sustainably made. The refresh leans into material innovations while simultaneously advancing the chair's

suite of performance-enhancing technology and styling options. The result is a new Mirra 2 that's physically light and lighter on the environment. Since its introduction, Mirra 2 has been on a trajectory to become Herman Miller's most sustainable performance seating design. In the early 2000s, Herman Miller collaborated with global environmental experts at MBDC, the creators of the Cradle-to-Cradle Certified Program, to establish "Design for the Environment" protocols which helped guide the development of the original Mirra. In 2013, the design received a significant update with dematerialization as a key focus making the chair 30% lighter than the original, marked by the name change to Mirra 2. Herman Miller is now incorporating more recycled content into the design, lowering the chair's overall carbon footprint by up to 17% compared to the previous version of Mirra 2. The nylon base and spine are now made from 100% recycled material. The expected reduction in the carbon footprint of the

updated Mirra 2 portfolio is equivalent to greenhouse gas emissions from driving 4.7 million miles in an average gasoline-powered passenger vehicle or the amount of energy needed to charge 121 million fully depleted smartphones and maintain that full charge throughout the day. Named for the way it mirrors the body's movements, Mirra 2 balances immediate comfort and personalized ergonomics through dynamic surfaces that respond to the slightest movement and intuitive adjustments to fine-tune fit. A fresh color palette brings new cordovan, ultramarine, olive, ochre, and alpine hues. [Read More](#)

>Integra Seating has achieved BIFMA LEVEL 1 certification for more than 35 products. The following product lines have successfully met the rigorous standards outlined in the ANSI/BIFMA e3-2019 Furniture Sustainability Standard, are Clean Air Gold Certified, and passed the LEVEL Credit 7.4.4 (Target Chemical Elimination, also formerly Healthier Hospitals Initiative compliant):

Herman Miller: The new Mirra 2 designed by Studio 7.5

officeneWSwire

Integra: Reef, one of 35+ products now certified BIFMA LEVEL 1

Lounge Seating

- Alpine Collection | Alta, Après, Brighton, Solitude, Summit
- Coastal Collection | Metal and Wood: Bay, Marina, Reef, Seaside, Tide
- CH Kids Collection
- Coffee House Collection | Standard Back and High Back (excludes Divider Panels)
- Kallise Lounge Collection
- Pax Lounge Collection
- The Lounge Collection | Elite, Flair, Rendezvous, Rendezvous Squared, Soirée
- Valayo Collection

Benches, Ottomans & Poufs

- Alpine Collection | Alpine Ottomans, Summit Ottomans
- Coastal Collection | Metal and Wood – Coastal Benches, Tide Footstool/Ottoman
- CH Kids Ottomans
- Coffee House Ottomans
- Kallise Ottomans & Benches

- Pax Poufs/Ottomans
- The Lounge Collection | All Elite, Flair, Rendezvous, Rendezvous Squared, and Soirée Ottomans
- Valayo Benches

Tables*

- Alpine Tables
- Coastal Tables
- Kallise Tables
- Kixsy Laptop Table
- Valayo Tables

*Includes solid surface and metal legs/bases only

“For over 40 years, we have taken sustainability and corporate responsibility seriously as evidenced in part by our component-based construction and superior product strength,” said Chandra Putnam, president of Integra Seating. “This BIFMA LEVEL 1 certification achievement reflects our ongoing journey and commitment to sustainability, transparency, and

innovation, ensuring that our customers can make sustainable choices without compromising design, strength, or functionality. Furniture manufacturing has always been a labor of love for Integra, and we are excited to offer this important ‘stamp of approval’ for our lounge seating and tables to the marketplace.”

>RESEAT announced a new partnership the Cradle to Cradle Products Innovation Institute that aims to establish new industry benchmarks for sustainable furniture. RESEAT is a leader in sustainable, second-life furniture solutions and a multi-award-winning SaaS inventory management platform utilizing DPP’s (digital product passports) to combat furniture waste. By working together, RESEAT and the Cradle toCradle Products Institute will foster standards and practices that prioritize the full lifecycle of commercial furniture, from design to disposal. The partnership will support RESEAT’s goal of reducing waste and carbon emissions associated with office furniture, ensuring that materials can be continually reused, refurbished, or recycled instead of being sent to landfills. “Our partnership with the Cradle to Cradle Products Institute is a transformative step forward for RESEAT and the commercial furniture industry, and we are very excited that C2C will leverage our RESEAT ID or DPP on manufactures furniture
