

-SUSTAINABILITY: *Valencia Stool* by **Andreu World:** Valencia is manufactured using advanced robotic 3D printing, utilizing industrial robotic arms equipped with thermoplastic pellet extruders. This technology makes it possible to create sculptural forms with a high level of detail and texture. The material used is a mixture of biodegradable and compostable PLA (polylactic acid), enriched with crushed natural cork, providing an organic texture, natural color, and a soft aroma, evoking the materiality of cork itself. The combination of technical precision and natural materials results in a solid, tactile, and sustainable design. It is also a charitable project, with profits donated to support the local community where it originates. andreuworld.com

>Healthcare Guest & Lounge Seating

-GOLD: *Odyssey* by **Integra Seating:** Odyssey, featuring a sleek, contemporary metal frame and a beautifully curved form, is the culmination of a quest to rethink what a guest chair can be. The design journey began with the goal of creating truly distinctive guest seating that elevates a space while offering the exceptional strength and durability for which Integra is known. The wrap-around design with its organic and continuous curved shape serves both aesthetic and functional purposes. The curve of the back is carefully sculpted to provide optimal lumbar support with a striking silhouette. Odyssey was meticulously engineered with Integra's DNA blueprint of comfortable seating with component-based construction and a minimum 1200 lb. static capacity. Yet even with that superior strength, the minimalist aesthetic of the slim profile and tapered legs gives it a light, airy appearance that integrates beautifully into any space. integraseating.com

>Healthcare: Patient Room Furnishings

-SILVER & BUSINESS IMPACT: *Ellie Recliner* by **Kwalu:** Thoughtfully designed by Von Robinson to support both patient and caregiver in every interaction, Ellie's signature embrace back, soft curves, and supportive posture create a sense of comfort and calm in healthcare settings—whether during extended treatments or short stays. Engineered for both emotional and physical well-being, Ellie features intuitive mobility and fully replaceable components to extend product life and reduce downtime. High-contact elements such as the loop arms, side lever, push bar, and bumper base are made with Protea™, a proprietary, non-porous material that resists damage and maintains its appearance through rigorous cleaning protocols. www.kwalu.com
