

NeoCon 2025: Guest What?

Joseph Starr - June 21, 2025

Fresh off their win in the **Guest and Lounge Seating category at NeoCon**, Integra has proven justified in their assertion that the Odyssey collection offers "truly distinctive guest seating to elevate a space while offering exceptional strength and durability."

The brand characterizes Odyssey as an innovative synthesis of form and function. The chair's sleek profile and appealing aesthetic is the proof in the pudding. With its metal frame capped in solid surface, Odyssey offers durability and design savvy in a variety of heights and multiple color options.

What's more, Odyssey will accompany and accommodate you wherever your personal odyssey takes you—whatever you might encounter. The chairs are engineered to support up to 1200 pounds and the optional integrated tablets up to 300.

Odyssey also features an integrated handle and wall-saver design, “perfect for high-use, easy-to-move seating in study areas, meeting rooms, cafés, reception areas, exam rooms, and many more spaces.”

Lastly, the line has been designed for long-term use and re-use/recyclability of components at end of life: the sleek, continuous form makes it easy to wipe down all sides of the seat and frame; and the components are replacable and recoverable.

See **Integra** to find out more.
