

Stinson, Kwalu and Integra Seating are among the Best of NeoCon healthcare product winners

Home > Healthcare > Stinson, Kwalu and Integra Seating are among the Best of NeoCon healthcare product winners

June 23, 2025 — If your healthcare facility needs new recliners, sleeper sofas, guest seating, and uniquely biodegradable textiles, look to these **Best of NeoCon 2025 Award-winners**.

Integra Seating

For Healthcare Guest and Lounge Seating, **Integra Seating's Odyssey** struck Gold. Odyssey is designed with a sleek, contemporary metal frame and a curved form. The design journey began with the goal of creating distinctive guest seating that elevates a space while offering exceptional strength and durability. The wrap-around design with its organic and continuous curved shape, serves both aesthetic and functional purposes. The sleek form, capped with solid surface in myriad color options, creates visual elegance and an integrated handle for unmatched function and cleanability. The curve of the back is carefully sculpted to provide optimal lumbar support with a striking silhouette.

Odyssey addresses several common challenges with guest seating in commercial environments. First, the 1200 lb. capacity ensures any user will be comfortably and safely accommodated. Next, Odyssey fits the guest seating needs of many areas with its six models: two seat widths with arms or armless, easy-access chair with arms and a foot rest for user stability and comfort, and a wider version to accommodate persons of size. The unique wrap-around design with nonporous solid surface caps on the entire wrap-around and integrated pull handle, not only enhances aesthetics but improves cleanability and ease of movement.

Odyssey comes with a Lifetime Warranty, even in 24/7 areas. Chairs are available with arms and armless in seat widths of 19.5" and 23.5". A 29.5" seat width with arms is available to comfortably and safely accommodate persons of size. The wall-saver design and integrated pull make Odyssey perfect for any high-use, easy-to-move seating in meeting rooms, check-in/reception areas, exam rooms, study areas, cafés, and many more spaces.

Great level of comfort. Durability and cleanability aspects are key to it being a great product. The load factor is impressive. Having each part

replaceable "on site" makes this line of seating attractive for the facilities team. The number of options between seat widths, arms, ortho height and tablet make it so there is a solution for any application. This is a great collection of chairs. It hits all the marks for healthcare furniture: cleanability, durability, weight capacity and beautiful design!
