

## Integra Seating Expands Award-Winning Odyssey Collection with Odyssey Tables

*Designed to complement the Odyssey seating line, released this past spring, the Odyssey Table carries forward the collection's hallmark sophistication, durability, and light profile while offering a new dimension of functionality.*

➡ Available in two top sizes (16" and 21") and two heights (21" and 27"), the Odyssey Table provides four versatile options to meet a range of needs, including an ortho-height solution at 27" for enhanced accessibility. Each table is crafted with a solid surface top supported by a tapered steel four-leg design, giving it a sleek, small-scale silhouette that effortlessly integrates into any commercial environment.

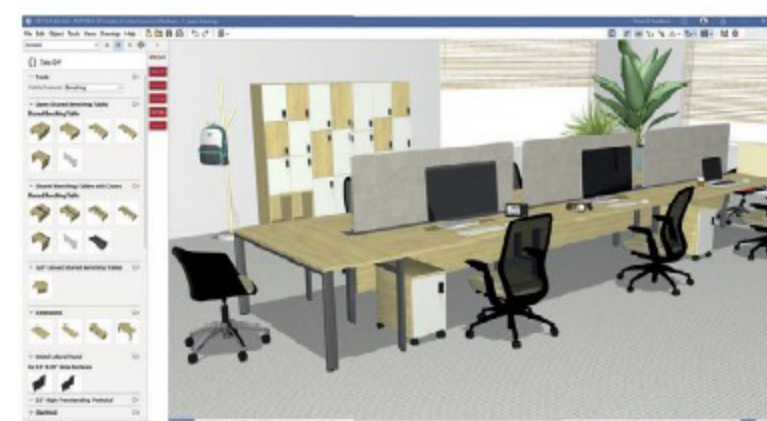

"The Odyssey Collection was built on the idea of combining strength, cleanability, and design sophistication," said Chandra Putnam, President of Integra Seating. "The Odyssey Table continues that vision—providing a light, contemporary table solution that pairs seamlessly with Odyssey seating and many of Integra's lounge seating designs."

Like the Odyssey chairs, Odyssey Tables are engineered for demanding, high-use spaces while maintaining a clean, minimalist appearance. The tables' solid surface top material ensures easy cleanability and long-term resilience, reinforcing Integra's commitment to environments where both performance and design matter most.

The Odyssey Collection, now complete with both seating and tables, embodies Integra's dedication to versatile, durable, sustainable, and beautifully crafted solutions. Unveiled earlier this year, Odyssey seating earned a Best of NeoCon Gold award, and the introduction of Odyssey Tables underscores Integra's continued innovation in commercial furniture design. **BoF**
