## **FOR IMMEDIATE RELEASE**

### **Integra Introduces New Additions to Summit Lounge Series**

*Part of the Alpine Collection, Beautifully Designed Club Chairs Bring Design Sophistication, Comfort and Durability to Commercial Environments*

#### **CHICAGO -- NEOCON EXPO (10<sup>th</sup> FLOOR SHOWROOM #10-140) – June 12, 2017**

– Integra Inc., a leading designer and manufacturer of high quality seating and tables for commercial environments, is introducing new additions to its [Summit Lounge](#) series at NeoCon, June 12-14 in Chicago. Part of the [Alpine Collection](#), a complete line-up of highly designed chairs, tables, benches and ottomans, the Summit Lounge series features beautifully designed, curved club chairs engineered with unmatched strength and comfort, providing an exceptional seating solution for any commercial interior.

Summit Lounge chairs are distinguished by multiple design innovations. A sleek, curved back design that gently angles into the sloped arms creates a warm and inviting aesthetic. Featuring an inherently smaller footprint, the chairs are well proportioned for healthcare waiting areas or other commercial spaces that desire a comfortable lounge look and feel, but which may have space constraints. Effortlessly combining design with practicality, a functional clean-out is smartly concealed from the front for enhanced aesthetics.

Multiple leg, base, arm cap and finish options – along with almost unlimited fabric options – enable designers to create their own unique look for any project. These multiple options also help ensure Summit Lounge perfectly harmonizes with the specific environment designers are creating.

A full complement of coordinating ottomans with matching bases or legs and tables round out this versatile product offering.

Summit chairs are available in two sizes, Standard and XL. Three base options are available: a swivel base with a 360 degree rotation, a swivel base with a self-returning function featuring a smartly designed center point locator, and a static base, as well as casters and a four-leg style for a stationary, coordinated option.

**-MORE-**

## **2—Integra Summit Lounge**

Leg options include steel cylinder legs with a brushed chrome finish and multiple powder coated finishes, wood legs with standard or custom wood finishes. Arm cap options on all Summit chairs include wood and solid surfaces.

Ottomans are available with the swivel base and leg options. Coordinating tables are available in the Alpine Collection.

Summit Lounge positively contributes to maintenance and cost of ownership. The nearly all-around clean-out seat allows for easy maintenance, keeping the seating area clean from debris, while its wipe-off material at the bottom allows debris to easily continue to the ground. Damaged or worn components can be easily recovered, repaired or replaced.

Summit Lounge features the superior strength for which Integra is known and allows a person of nearly any weight to sit safely and securely. The static, integrated bariatric weight capacity of 2,000 lbs. is well above other bariatric rated seating. Summit's exceptional 1,000 lb. drop capacity further reduces risk management for a facility. Like other products manufactured by Integra, Summit Lounge seating comes with a lifetime warranty, which includes use in 24/7 environments.

Summit Lounge was designed and engineered the Integra Design Team in collaboration with 2B Studios. Ardis C. Hutchins, AIA, IIDA, CHID, EDAC, an interior architect with University of Wisconsin Hospital and Clinics, provided initial design criteria input.

### **About Integra**

Located in southern Wisconsin, Integra Inc., is a family-owned and operated company that has been designing and manufacturing seating and tables for lounge and reception areas since 1982. The company started with Monroe Putnam's patented "tube and plug" inner construction design. Since then, Integra owners, Monroe and Deena Putnam, have grown Integra into a leading company that accommodates the unique requirements of each customer and end-user, and continually adds new products that exceed customer expectations. Integra sets the standard for products with functional style, durability and flexibility combined with first-class customer service. With a focus on durability and minimizing environmental impact, all Integra seating lines have replaceable components to provide a more sustainable and cost effective solution for any facility.
