

# Color Inspiration Board | CHALK

by Kimberle  
Frost

**Kimberle** has over 25 years of experience as an independent consultant offering services in textile design and styling, color consultation, and textile marketing in both the contract and residential markets. Her portfolio includes textile work for highly regarded companies such as Robert Allen, Designtex, Mayer Fabrics, Momentum, Arc Com and Ultrafabrics.

Chalk is derived from a soft white, porous, sedimentary, carbonate rock and is a variety of limestone. The lightest of all colors, CHALK is a warm approach to white that, depending on light, can vary from a subtle whisper of grayish white to the brightness of fresh snow. ~ Kimberle Frost

Powder Coats: Chalk and Glacier  
Solid Surfaces: Hi-Macs Arctic White, Haze, and Frostine  
Laminate: Wilsonart Phantom Pearl

Wood Finish on Maple: Sugar
