

Integra Kallise Lounge Collection

www.integraseating.com

Integra Inc., a leading designer and manufacturer of high quality seating and tables for commercial environments, is showcasing its Kallise Lounge Collection at this year's NeoCon Expo, June 12-14 in Chicago.

With a range of options that can create a residential-scale with a contemporary, mid-century modern or even an international look, the collection seamlessly combines beautiful aesthetics and unmatched durability with desired comfort.

The complete collection, most of which was initially introduced in March, consists of lounge chairs, two-seat settees and three-seat sofas. Ottomans, benches and a range of tables round out the collection.

Four arm styles are available: two arm widths of 3" and 5", both with two leg height options of 3" and 8" heights. Legs are available in either solid wood with eight finish options, steel with four powder coat finish choices or steel with brushed chrome. A caster leg option for mobility in either wood or steel is also available with the chair.

Additional options include three different arm caps: solid surface, solid wood or HPL over a plywood edge. The stylish arm caps are flat on top with beveled tapering edges.

Adding to its flexibility to meet any functionality or design need, a sleek-looking yet ultra-strong tablet arm can be added to one side of a chair and either or both sides of the settee or the sofa. The tablet, with or without cup holder, is available in solid surface, solid wood and HPL over a plywood edge. Power ports, with standard plug or two USB units, are available in a choice of white, black or gray.

"The Kallise Collection smartly bridges the gap between aesthetics and strength on one side and durability and comfort on the other," said Chandra Putnam, Integra's Director of Sales and Marketing. "The number of pieces with the same finish options creates design continuity. Yet the collection also has a high level of modularity, where one component, say a seat or an arm cap, can be replaced if it becomes damaged or worn. Kallise is designed to meet the needs of many end-users."

The Kallise chairs pass a 1,000 lb. drop test and a 2000 lb. static load test. The tablet arm passes a 300 lb. drop test. Made with steel inner construction and featuring dymetrol suspension, Kallise seating products come with a lifetime warranty. **BoF**
